

Patient put on liquid diet on 02.11.12 morning.

Seen by Dr.Murali, Gastroenterologist. Patient planned for CT Scan abdomen and UGI scopy.

On 02.11.12 patient was seen by Dr.C.M.Thiagarajan team – Nephrologist. He opined as acute interstitial nephritis with gastritis. He advised urine spot protein, Creatinine and C3 and C4. Intake and output monitored. Patient continued to have pain abdomen and UGI scopy planned. ECG done 3.11.12 – Sinus tachycardia. Xray chest done.

On 03.11.12 noon patient shifted for Endoscopy. Patient developed labored breathing before Endoscopy hence UGI scopy abandoned. Patient went for bradycardia and cardiorespiratory arrest. CPR measures initiated. HR picked up and patient shifted to IMCU.

Seen by Dr.K.P. Sureshkumar, Cardiologist. ECG – Sinus Tachycardia. Echocardiogram s/o pericardial effusion, mild dilated LV. Patient put on maximum inotropic support and connected to ventilator. Patient again went for bradycardia. CPR measures continued as per ACLS protocol. Despite resuscitation measures, patient did not respond and remained in asystole and declared dead at 2.55 pm on 03.11.12.

MR. A. MURALI,
CONSULTANT GASTROENTEROLOGIST
