The left kidney measures 11.1 x 4.7 cms. It is normal in size. A well defined cyst is seen in the lower pole measuring 4.1 x 3.9 x 3.4 cms, which shows thin internal septae. No solid components seen within. There is no calculus or calyceal dilatation.

The left ureter is not dilated.

The bladder is empty.

Iliac fossae are normal.

No focal bowel wall thickening or fluid collection is seen in the right iliac fossa.

IMPRESSION : = Mild splenomegaly.

= Septated left renal cyst.
